WHY HAVE YOUR CHILD TESTED FOR VISION AND HEARING PROBLEMS?

UP TO 10% OF CHILDREN MAY HAVE AN UNDETECTED **VISION** OR **HEARING PROBLEM** THAT CAN BE EASILY TREATED.

VISION

Vision problems, such as amblyopia (lazy eye), often go unnoticed in young children.

If missed, they may have a major impact on a child's ability to learn, and negatively affect *wellbeing* at school.

HEARING

5% of children under 10 have glue ear.

30% of those affected may suffer long term hearing problems or deafness.

Hearing is screened at birth, but sadly 50% of hearing loss occurs after this.

THE SOLUTION

We want to make it much easier to get your child checked at school using **SCHOOL HEALTH CHECK**.
